

If you are a premenopausal woman who has been diagnosed with Localized Provoked Vulvodynia (LPV) or you have experienced external vulvar pain for at least three months, you may be able to join a vaginal biome research study.

WHO CAN PARTICIPATE:

- Pre-menopausal women
- Current diagnosis of LPV for at least the past three months

OUR GOAL:

- ✓ Lower pain intensity
- ✓ Improve the vaginal microbiome

WHAT TO EXPECT WITH PARTICIPATION:

- Be in the study for 12 weeks (4 study visits)
- Cotton swab test on the vulva to test sensitivity
- Collect vaginal biome and vaginal pH
- Complete questionnaires
- Might be asked to use a vaginal hygiene system

EARN TWO \$50 AMAZON GIFTCARDS FOR YOUR PARTICIPATION!

You can help make a difference in women's healthcare!

Email info@helloclimax.com or contact CRC@vaginalbiomescience.com for more information or how you can participate.
